Payroll 360

An All-Around Solution That Works With Your Payroll System

Your retirement plan is essential to a strong business foundation. However, some of the administrative tasks that go along with operating the plan—particularly those related to payroll processing—can demand a lot of attention. Payroll 360 reduces the administrative burden and some of the risks associated with manually processing payroll-related data in the retirement recordkeeping system, delivering benefits that include:
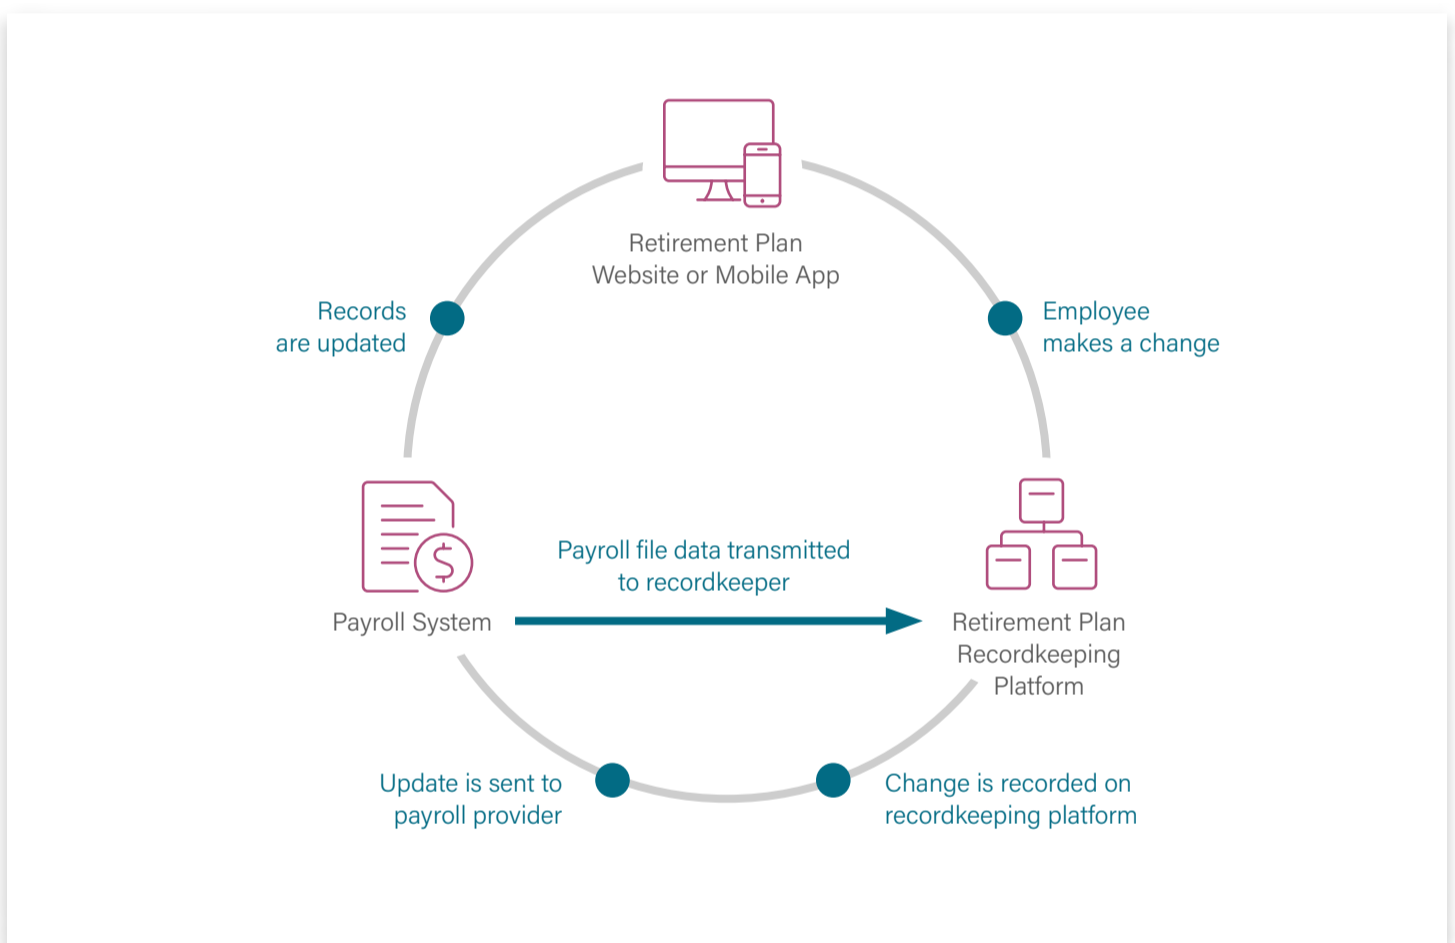

✓ **More time**

No more monitoring daily reports or emails from the recordkeeping system in order to process employee changes or transactions that impact your payroll.

✓ **Reduced risk**

Seamless data transmission so you won't miss or incorrectly process an employee request.

✓ **Peace of mind**

Actions taken by employees on the employee website are executed in an accurate and timely manner.

Retirement Plan Website or Mobile App

Records are updated

Employee makes a change

Payroll file data transmitted to recordkeeper

Payroll System

Retirement Plan Recordkeeping Platform

Update is sent to payroll provider

Change is recorded on recordkeeping platform

How it works

We integrate the retirement recordkeeping platform with your payroll system.* When an employee makes a change to their savings rate or loan status from the employee website or READY**SAVE**™ app, the data is transmitted directly to the payroll provider—and updates are made for the employee within the payroll system's records. Additionally, payroll file data is transmitted directly from the payroll provider to the recordkeeper to ensure plan records are accurate and up-to-date.

More payroll provider partners, more ways to simplify plan management.

We work with many leading payroll providers and continue to add more. See a complete list of our Payroll 360 partners and learn how to get started here.
